Professional Summary

As a passionate MERN Stack Developer with over 2 years of experience, I specialize in building scalable, efficient, and high-performing web and mobile applications. With expertise in React.js, Node.js, Express.js, and React Native, I focus on creating seamless user experiences and efficient backend systems. I am committed to leveraging modern technologies such as Redux and MongoDB to build full-stack applications. My goal is to grow as a developer and contribute to impactful projects, continuously expanding my skills and working towards achieving something significant in the tech industry.

Technical Skills

Frontend Technologies: React.js, Next.js, React Native, Redux, React Hook Form, Material-UI, ShadCN, Tailwind CSS, Vue Js,

Backend Technologies: Node.js, Express.js, MongoDB, SQL, JWT, Appwrite, Joy, Laravel,

Version Control: Git

Other Tools & Technologies: Webpack, Vite, RESTful APIs

Work Experience

MERN Stack + React Native Developer

Trigono Technologies | Pakistan | Duration: 1.5 Years

Key Responsibilities:

- Developed and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring seamless integration between backend and frontend components.
- Integrated backend services with frontend components, collaborating closely with both

frontend and backend teams to deliver scalable, high-performance applications.

- Implemented RESTful APIs to facilitate communication between the frontend and backend, ensuring data consistency and security across platforms.
- Utilized Redux for state management to handle complex application states, ensuring smooth data flow between components.
- Created dynamic, responsive user interfaces with React.js and styled components using Material-UI, ShadCN, and Tailwind CSS, optimizing for user experience.
- Focused on database design and management using MongoDB, optimizing queries and indexing for better performance and scalability.
- Leveraged JWT for secure user authentication and authorization, ensuring safe login and data access.
- Collaborated with cross-functional teams using Agile methodologies, participating in sprint planning, code reviews, and regular team meetings.

Key Achievements:

- Vid Omegle: Developed a random video call application where users can connect with strangers in a live video chat environment.
- Law Advisor: Built a lawyer-as-a-service platform using Laravel, Vue.js, and Inertia.js.
- Ibiza eCommerce App: Developed a full-featured eCommerce platform using Next.js 14 and ShadCN.
- Aora App: Built a React Native application with custom animations and user media upload functionality using Context API, Appwrite, and custom hooks.

Full Stack Developer

Tinker Bytes | Pakistan | Duration: October 2024

Key Responsibilities:

- Collaborated with the development team to create modern, responsive web applications using Next.js and ShadCN.
- Designed, implemented, and optimized APIs for seamless backend integration with frontend components.
- Developed reusable, scalable components to ensure maintainable codebases and better performance.
- Utilized Redux for efficient state management, enhancing dynamic features such as cart management and user interactions.

Key Achievements:

- Ibiza eCommerce App: Delivered a full-featured eCommerce platform designed for a modern shopping experience.
- Used Next.js 14 and ShadCN for a high-performance, SEO-friendly frontend.
- Implemented features for real-time inventory updates, secure payment processing, and dynamic product catalogs.
- Successfully deployed the application on Vercel, ensuring reliability and scalability.

Key Projects

Vid Omegle

Developed a random video call application allowing users to connect with strangers via live video chat. Used Material-UI for frontend design and Redux for state management. Integrated backend APIs for real-time video communication.

Law Advisor

Built a lawyer-as-a-service platform connecting users with professional legal assistance. Used Laravel for backend and Vue.js with Inertia.js for frontend development. Project Link:

Ibiza eCommerce App

Developed an eCommerce platform using Next.js 14 and ShadCN, with features like real-time inventory updates, secure payment processing, and dynamic product catalogs. The application was deployed on Vercel, ensuring scalability and reliability.

Aora App

Built a React Native app with custom animations and media upload capabilities, allowing users to upload and play images/videos. Used Context API for state management and Appwrite for backend integration. Project Link: [<https://github.com/FaizanFazal12/aora>]

CoinBuse

Developed a personal web app using React.js for the frontend and Node.js for the backend. Utilized Redux Toolkit for state management, implemented protected routes, and used Yup for frontend validation. On the backend, used Joi for validation. " "Project Link: [<https://faizan-app.onrender.com/>]

Education

Intermediate (Ongoing, 2023) - TIPS College, Pakistan

Languages

English (Fluent)

Urdu (Native)
